

LILIAN CORDOVA

Dublin, Ireland | 0834424075 | liliancordovahernandez@gmail.com | [Linkedin](#) | [Portfolio](#)

PROFILE

Business Analyst with an MSc in Business Analytics (Dublin City University, 2.1), applying Python, SQL, Power BI, and machine learning developed through coursework and a applied consultancy practicum project. Background in International Trade, with professional experience at a mid-sized retail business. Targeting roles in Business Intelligence, Data Analysis, Business Consulting, or NLP, combining that technical grounding with analytical and client-facing skills.

TOOLS & TECHNICAL SKILLS

- **Business Intelligence:** Power BI, Tableau, Advanced Microsoft Excel (KPI tracking, reporting tools).
- **Data & Analytics:** Python (Scikit-learn, Pandas, NLTK), SQL, Random Forest, Gradient Boosting, Sentiment Analysis.
- **Languages:** English (Advanced/C1 – IELTS Band 7.0), Spanish (Native).

EDUCATION

MSc in Business Analytics | *Dublin City University, Ireland*

Second Class Honours, Grade 1 (2.1)

- **Key Modules:** Applied Business Analytics, Machine Learning for Business, Strategic AI Integration.
- **Applied Research:** Developed an LLM-enabled content production pipeline to optimise workflow efficiency for a retail client (client name withheld).

Bachelor of International Trade and Business | *Universidad de Sonora, Mexico* — *Titled*

- **Focus:** Global logistics, international commerce, and competitive strategy for multinational entities.

KEY PROJECTS

Project A: Financial Sentiment Analysis using NLP

Developed a sentiment analysis model to classify financial news phrases as positive, negative, or neutral.

- Implemented NLP techniques including tokenisation, stop-word removal, and lemmatisation using the NLTK library.
- Used feature engineering (TF-IDF vectorisation) to identify market sentiment trends with high accuracy.

Project B: AutoMotion Co. Performance Dashboard (Power BI)

Four-person team project for a Statistical Models and Methods for Business Analytics module. Built a Power BI dashboard analysing nine years of financial data across regions, products, and cost structure for a company with a -12.8% average net margin.

- Authored the Product Level Analysis section: net profit by product, year-over-year profit trends, and unit cost vs. unit price behaviour across ten products, using median-based comparison to handle outliers.
- Findings fed into a team recommendation for a differentiated pricing strategy by product and region.

PROFESSIONAL EXPERIENCE

Dublin City University — Applied Consultancy Project (Practicum) | *February 2026 – August 2026*

AI Content Pipeline for a Retail Client (client name withheld)

- Part of a six-person consultancy team that built an eight-stage AI content-generation pipeline for an Irish retail client, cutting video production from roughly 16 hours to minutes and multi-format resizing from 2–4 hours to about 22 seconds per asset.
- Within the team, was responsible for two of the report's sections: the systematic literature review (45 studies, Okoli's method, PRISMA 2020) and the synthesis of combined research findings connecting the evidence base to the build's design decisions.

- Helped conduct the stakeholder interviews that, combined with the literature review, directly shaped the recommended build option, chosen over two alternatives on cost, speed, and maintainability.
- Built an as-is BPMN 2.0 process diagram (Python, matplotlib) mapping the client's existing content production workflow, using stakeholder interview evidence to identify multi-format resizing as the key bottleneck, a finding that directly shaped the team's requirements and explains why that stage became the pipeline's primary design target.

Florería y Regalos Martha — Customer Service / Social Media | *Hermosillo, Mexico* | *February 2020 – March 2024*

- Managed inventory and logistics for a mid-sized retail business, improving service delivery efficiency.
- Developed commercial awareness through direct customer interaction and social media management.

ADDITIONAL INFORMATION

- **Languages:** English (Advanced/C1 – IELTS Band 7.0), Spanish (Native).
- **Certifications:** IELTS Academic Band 7; Good Research Conduct Certificate (Epigeum / Dublin City University).

Continuous Professional Development:

- **AI Fundamentals:** Generative AI, Large Language Models, Prompt Engineering, ChatGPT.
- **Programming:** Python Fundamentals, SQL (Databases, Joins, Filtering).
- **Data Ethics & Security:** Data Ethics, Applying Ethical Thinking, Handling Data Securely, Information Security.
- **Data Communication:** Communicating Data Effectively, Telling Stories with Data, Presenting Your Data.
- **Interests:** NLP applications in finance and commerce; Large Language Models for business automation; data storytelling for analytical results.
- **Consulting & Client Management:** How to Think Like a Consultant, Consulting Foundations (Client Management and Relationships; The Concept of Value), Project Management Foundations, Teamwork Foundations.
